OmniTech Retail Solutions

Consumer Trade-In and E-Waste Recycling Operations

Version 3.0 — Effective Date: April 1, 2026 — Document Reference: DOC-05-TRG

1 1. Grading Criteria and Valuation Matrix

OmniTech operates an in-store and mail-in hardware trade-in program that allows customers to exchange used electronics for store credit.

1.1 1.1 Condition Tier Classifications

All submitted devices undergo physical and functional testing to determine appraisal credit value according to three strict grading levels:

- **Grade A (Like New):** Device displays zero cosmetic scratches, fully functional battery (≥85% capacity), flawless display, and includes original packaging. Receives **100% of appraisal value**.
- **Grade B (Fair/Used):** Minor enclosure scratches or light scuffs; fully operational screen and buttons; battery health between 70%–84%. Receives **a 25% reduction from baseline valuation**.
- **Grade C (Damaged/Non-Functional):** Cracked glass, swollen battery, or non-functional ports. Ineligible for trade-in monetary valuation; routed directly to zero-value e-waste recycling.

Table 5.1: Device Trade-in Valuation Reductions

Condition Grade	Valuation Percentage	Physical Standards
Grade A	100% Appraisal Value	Flawless display, perfect chassis, battery ≥85%.
Grade B	75% Appraisal Value	Minor scratches, battery between 70%–84%.
Grade C	0% (Recycle Only)	Cracked glass, water indicator tripped, unusable.

2 2. Data Sanitation Standards and Ownership Transfer

2.1 2.1 NIST 800-88 Data Wiping Compliance

Customer privacy is paramount. All trade-in storage drives undergo data destruction before being resold or recycled:

1. **3-Pass Wipe Routine:** Internal SSDs and magnetic drives undergo an automated **NIST 800-88 compliant 3-pass data wipe** performed by intake technicians.
2. **Unreachable Drives:** If a drive cannot be overwritten due to hardware controller lock, it is removed and physically shredded.
3. **Customer Responsibility:** Customers are urged to perform a factory reset prior to submission; however, OmniTech executes mandatory secondary erasure upon receipt.

2.2 2.2 Permanent Ownership Transfer

Once a trade-in inspection is finalized and the customer accepts the store credit payment, title and ownership of the device transfer permanently to OmniTech. Devices cannot be retrieved after store credit issuance.
