

# Document 11: Corporate B2B Procurement, Credit Terms & Bulk Purchasing Policy

Enterprise B2B Operations & Commercial Legal Division

Version 3.2 — Updated October 2026

## 1 Executive Summary & Account Eligibility

This policy framework governs commercial business-to-business (B2B) accounts, line-of-credit financing, volume purchase tiers, tax-exempt purchasing, and account audit requirements across all global corporate customer accounts.

## 2 Net-30 Terms & Line of Credit Approval Framework

Commercial accounts seeking trade credit or delayed invoice payment options must complete a formal B2B Line of Credit Application prior to order placement.

### 2.1 Credit Limit Assessment & Audit Criteria

- **Maximum Credit Allocation:** Approved business accounts are eligible for an operating credit line of up to \$50,000 USD, subject to a mandatory Dun & Bradstreet (D&B) financial audit, PAYDEX score review ( $\geq 80$ ), and two verified trade references.
- **Credit Limit Increases:** Requests to extend lines of credit beyond \$50,000 require audited corporate financial statements for the preceding two fiscal years and written approval from the Chief Financial Officer (CFO).

### 2.2 Payment Deadlines & Default Penalties

- **Net-30 Standard Schedule:** All invoices under trade credit must be settled in full within 30 calendar days from the date of invoice issuance.
- **Late Payment Interest Fee:** Unpaid balances past the 30-day grace period incur an automatic monthly late service fee of 1.5% (18% per annum) assessed against the remaining unpaid balance on the 1st of every calendar month.
- **Account Hold Conditions:** Accounts with invoices exceeding 45 days past due will experience an automatic administrative lock, blocking all future purchase orders and technical support access until accounts are settled.

### 3 Bulk Ordering Volume Discount Structure

Corporate clients ordering enterprise hardware, fleet laptops, or data center infrastructure in volume automatically qualify for tiered price adjustments calculated off current MSRP list prices.

#### 3.1 Volume Discount Matrix

| Order Volume Tier        | Unit Quantity Range | Applied Discount Rate        |
|--------------------------|---------------------|------------------------------|
| Tier 1: Small Fleet      | 10 – 49 Units       | 5% off MSRP                  |
| Tier 2: Mid-Enterprise   | 50 – 199 Units      | 12% off MSRP                 |
| Tier 3: Enterprise Scale | 200+ Units          | 18% Custom Contract Discount |

Table 1: B2B Hardware Volume Discount Schedule

#### 3.2 Custom Contract & Resale Directives

- **Custom Enterprise Agreements:** Orders exceeding 200 units are routed to a dedicated Procurement Account Manager to draft a customized Master Services Agreement (MSA) incorporating custom SLA terms and scheduled drop-ship deliveries.
- **Prohibition on Unauthorized Reselling:** Equipment purchased under B2B volume pricing is strictly intended for internal enterprise deployment or authorized client managed services. Reselling assets on third-party consumer marketplaces without explicit authorization results in immediate account termination.

### 4 Tax-Exempt Purchasing & Documentation

Organizations claiming tax-exempt status must submit a valid State Resale Certificate or IRS 501(c)(3) determination letter prior to order execution. Tax adjustments cannot be applied retroactively to finalized invoices.
