

Document 12: Gift Cards, Promotional Certificates, and Store Credit Governance

Customer Financial Services & Legal Compliance

Version 2.1 — Updated October 2026

1 Overview

This policy defines the issuance, redemption, balance maintenance, loss protection, and statutory compliance standards for physical store gift cards, digital e-gift cards, promotional store vouchers, and store credits.

2 Redemption Rules & Expiration Directives

- **Expiration Limits:** In accordance with federal guidelines and state consumer protection acts, neither physical gift cards nor digital e-gift cards expire. Funds remain valid indefinitely until fully redeemed.
- **Dormancy & Maintenance Fees:** Cards accrue no inactivity fees, service charges, or monthly balance maintenance deductions regardless of how long the account remains idle.
- **Redemption Channels:** Cards are valid for purchasing all physical products, downloadable software, and cloud service subscriptions across both physical retail stores and online checkout portals.
- **Cash Redemption Limitations:** Gift cards are not redeemable for cash, check, or bank transfer except where mandated by local state law (e.g., accounts with remaining balances under \$10.00 in California and applicable jurisdictions can request cash refunds upon request).

3 Replacement Policy for Lost, Stolen, or Damaged Cards

The company maintains strict security protocols for reissuing card balances to safeguard against customer fraud and fraudulent transfers.

3.1 Reissuance Requirements

1. **Proof of Purchase Mandate:** To request a replacement for a lost or stolen card, customers must provide original proof of purchase (sales receipt, online invoice, or order number) alongside the full original 16-digit gift card number.
2. **Unused Balance Verification:** Reissuance is strictly limited to the verified remaining balance at the time the loss report is logged into our system. Used or fraudulently claimed funds prior to reporting cannot be restored.
3. **Replacement Fee:** Physical replacement cards sent via tracked mail carry a nominal \$5.00 administrative reissuance deduction from the remaining card balance. Digital e-gift card reissuance carries no fee.

4 Combining Cards & Checkout Stacking Rules

- **Card Merging Limit:** Customers can apply up to 5 individual gift cards per single checkout transaction online or in-store.
- **Merging Balances:** Customers wishing to consolidate more than 5 smaller gift cards into a single high-value card must contact Customer Support for balance consolidation assistance.
- **Promotional Stacking:** Gift cards function as valid tender and may be combined with ongoing promotional sale codes, seasonal store discounts, and hardware trade-in credits.

5 Fraudulent Activity & Unauthorized Resellers

Cards obtained from unapproved secondary gift card exchanges or unauthorized auction sites are subject to immediate cancellation without compensation.
